AND THEIR USE AS LOW VISCOSITY BINDERS AND MODIFIERS IN
COATING COMPOSITIONS

Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

RESPONSE

Concerning the Office Action mailed on December 13th, 2006, entry of the following response is respectfully requested.

Claims 1-64 are presently under consideration by the Examiner. In the First Office Action mailed on March 22nd 2006, Claims 1-64 were subject to a restriction requirement. Applicants elected with traverse Group I (Claims 1-46) which are drawn to a cellulose ester product. Also, in the First Office Action, the Examiner also requires a selection of species. Applicants elected with traverse for the reasons stated above Claims 36-38. After speaking with the Examiner in a teleconference, Applicants explained that Claims 36-38 selected particular C3-C4 ester, acetyl, and hydroxyl substitution ranges and are of particular interest to Applicants. Concerning additives, Applicants elected with traverse leveling, rheology, and flow control agents. Concerning the water-soluble resin, Applicants elected with traverse acrylics.

In the Office Action mailed on December 13th, 2006, the Examiner states that applicants did not include a listing of all claims readable on the elected claims 36-38. Claims 5 and 19 read on claims 36-38.

If the Examiner has any questions or comments, please feel free to contact me.

Respectfully submitted,

Eastman Chemical Company
